# FUNNY

## Funny Window Colour

The motif must be made on plastic foil. Start by drawing the contours – be careful not to leave open spaces in the line.

Let the contour dry for about 2 hours, before you start filling out the fields. Work directly from the bottle. Press out a small quantity of colour and spread it with the spray nozzle in a not too thin layer. The motif will remain more stable if you avoid open spaces. Complete open spaces with no. 3560 Clear.

Let it dry for 24 hours before you remove it from the plastic foil. The motif sticks to all plain surfaces and can be removed again and again.

Do not stir or shake, as this will create many bubbles. Funny Window Colour is available in many beautiful colours incl. glitter and metallic colours.

Available i 85 ml and 250 ml bottles.
